TechuGo

MAY 2024 - PRESENT

Node.js Trainee

- Working As Node.js Trainee, my work is to report tainer about the allotted task and follow their instructions.

PERSONAL PROJECTS

• YOUTUBE BACKEND PROJECT

This project has all possible functionality a youtube app can have, video uploading, with subscribed, like, comment features. User can create their own channel as well as can view other user uploaded vedios.

TechStack:- Node.js with Express.js framework, Multer for uploading videos, mongodb aggregations , JWT for API security, Data Modeling, Third-party package integration, debugging, soltion oriented approach

EDUCATION

- JNCT, RGPV UNIVERSITY
2016-2020
B.E. [COMPUTER SCIENCE]
7.65 CGPA
- ROSEAL PUBLIC H.S.
SCHOOL 2015-2016
SENIOR SECONDARY 74.65 %

SOFT SKILLS

- Worked as Volunteer in college festivals
- Helping and solution oriented Nature
- Enjoy Interacting with new peoples
- Active Learner
- Good Observer with Adaptive Nature

• CHATAPP [MERN PROJECT LIVE ON VERCEL]

A real-time chat application to handle real-time communication between clients (web browsers, mobile apps, etc.). After Login, User can chat with any individual and also in groups.

TechStack:- Node.js ,Express used to handle HTTP requests, routing, middleware, etc. Socket.io for handling bidirectional communication. React used on Frontend with Tailwind Library.

ECOMMERCE BACKEND PROJECT

- **ECOMMERCE PROJECT** has all the functionality a common ecommerce web application has signup login as securing features with, User can create Order and filter their products and can added into cart.

TechStack:- Node.js +Express.js, User Authentication system with JWT Tokens, Third Party Packages Integration, Data Modeling, Admin Panel. React.js, RTK, Dev UI components on build frontend.

• SNAPDEV

SNAPDEV is a fully functioned backend app, integrated with CHATGPT , its an app like our own GPT App which resolve every possible query.

TechStack:- Node.js, Express.js used at server side, RESTFUL API with HTTP protocol to develop optimized and scalable APIs, Open Ai Integration, POSTMAN to test the app features.

• Mini Loan App

It is an app that allows authenticated users to go through a loan application. All the loans will be assumed to have a "weekly" repayment frequency. After the loan is approved, the user must be able to submit the weekly loan repayments.

TechStack:- MERN App, Node.js+Express.js for backend, mongodb for database and React.js, Redux for Frontend. JWT for Authentication, developed WEB APIs, uses hooks, and Tailwind CSS Component .
